### CORONAVIRUS OUTBREAK MYTH VS FACT

**MYTH**  
Vitamin C supplements will stop you from catching COVID-19

**FACT**  
Researchers have yet to find any evidence that vitamin C supplements can render people immune to COVID-19 infection.

not experts in this field, though very little research suggests that adding pepper to your diet may help prevent or cure COVID-19. The best way to protect yourself against the new coronavirus is to keep at least 1 metre away from others and to wash your hands frequently and thoroughly. It is also beneficial for your general health to maintain a balanced diet, stay well hydrated, exercise regularly and sleep well.

**FACT:**  
Adding pepper to your soup or other meals DOES NOT prevent or cure COVID-19.

#Coronavirus #COVID19

Garlic is a healthy food that may have some antimicrobial properties. However, there is no evidence from the current outbreak that eating garlic has protected people from the new coronavirus (2019-nCoV).

Can eating garlic help prevent infection with the new coronavirus?

#2019nCoV

To date, there is no evidence or information to suggest that the COVID-19 virus is transmitted through houseflies.

The virus that causes COVID-19 spreads primarily through droplets generated when an infected person coughs, sneezes or speaks. You can also become infected by touching a contaminated surface and then touching your eyes, nose or mouth before washing your hands. To protect yourself, keep at least 1-metre distance from others and disinfect frequently touched surfaces. Clean your hands thoroughly and often and avoid touching your eyes, mouth and nose.

## About the Webinar:-

Web design refers to the design of websites that are displayed on the internet. It usually refers to the user experience aspects of website development rather than software development. Web design used to be focused on designing websites for desktop browsers; however, since the mid-2010s, design for mobile and tablet browsers has become ever-increasingly important.

Millions of people around the world have access to internet and any business can benefit greatly by having a well designed, professional looking website because website speaks a lot about your business and represent the image of your company.

The most important reason for having a website or importance of a website is to be found by your potential clients, as they are likely to find you on the web and get access to your contact details, business hours, details about your product and services, in fact your website is working for you 24/7 even when your office is closed. Your website can be as important as your telephone connection. The simple point of having a website for your business is, increasingly numbers of people are turning to the internet to find out information about product and services and your presence on the internet makes it easy for your prospective clients to find you easily.

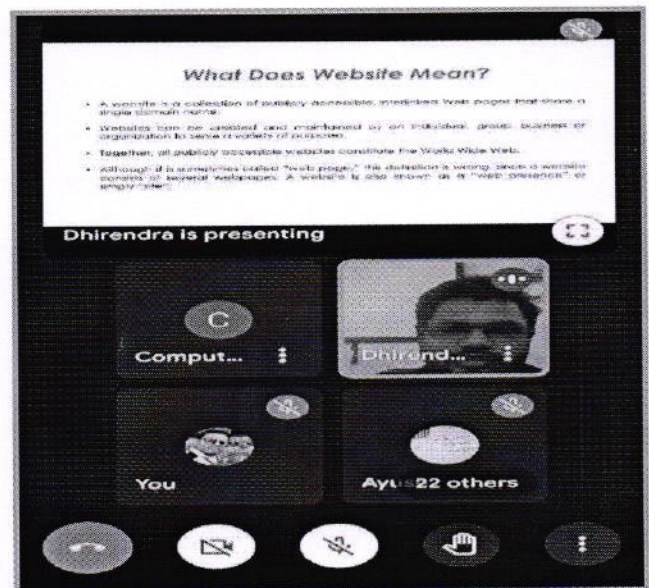

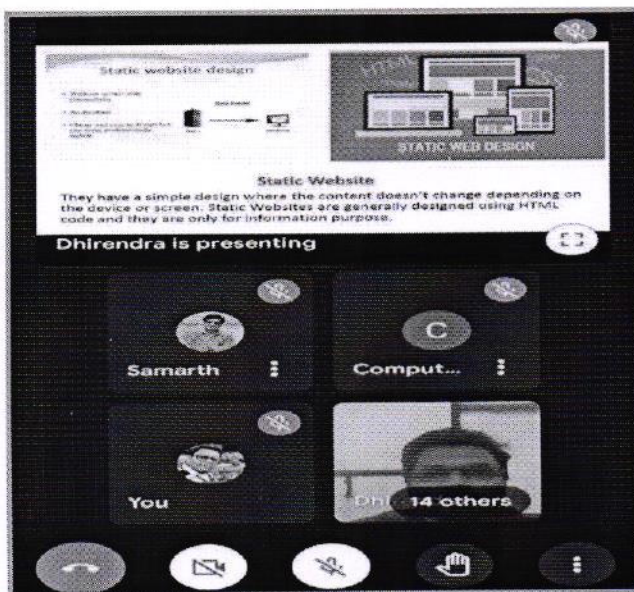

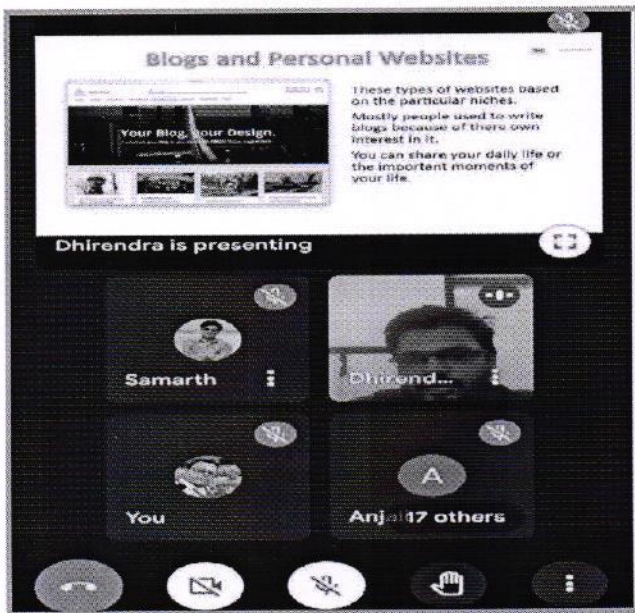

## Objectives of the Webinar:

- An e-commerce website, even small businesses can advertise their products massively on the platforms like Google & Facebook.
- Some businesses need a website to create awareness about their services or products.
- Providing quality content on your website, regularly adding new information establishing trust, marketing your website on other websites and social media.
- E-mail marketing lists, online support (live chat), webinars, and content designed to give your visitor a reason to come back.

## 07 Days Activity week and Hands on Training on Advance Learning in Biological Science. 13/01/2020 to 19/01/2020

This is the first time of my life to join such a program. This program has been very effective for me. I want to thank my dear Microbiology Department that they have provided this golden opportunity for us. Through this program, we have learned a lot of knowledge related our subject and other. The program started 10 am on day 13/01/2020, whose guest was Dr. Rajeev Choudhary sir. He provided us with detailed knowledge of the statistical tools. And the second guest of this day was Dr. Sapna Sharma mam, who gave information about the case study. Our second day started on 14/01/2020 whose guest was Dr. Ranjana Sahu mam from Mahila College Bhubai. She taught us about the subject of bioinformatics. And in this the second half of this day, a poster competition was organized in which all the student presented posters by forming group. On 15/01/2020 was third day of the program, whose guest was Dr. Anki Parganitha mam, she informed us about the research publication, research malain, plagiarism etc. The fourth day of the seven days activity week was on 16th, on this day the quiz competition was organized by our HOD mam, in which all the students participated with great interest. This competition was played in two rounds, the first screening round and the second stage round game. The fifth day started with Dr. Deepak Bharti sir on 17/01/2020 he was us study of the SDS PAGE, DNA isolation and PCR. 18/01/2020, was our last day of activity

week. On this day Dr. Deepak Bhatti sir taught SDS-PAGE and isolation of DNA from cells.

And in this way the last of our "seven days activity week on advanced learning in Biological sciences" happened very well. And last day of week i.e. on 19/01/2020 decided to study tour for which we had to take the place Rainada ABIS dairy factory.

And last thanks our Department & department for giving us the benefit of this opportunity.

## Study Tour 19/01/2020

### ABIS Dairy Rajnandgaon

We were taken to ABIS Dairy Rajnandgaon for a study tour. We left our college at 10:30 am to go on 19/01/2020. We enjoyed a lot in the tour, everyone was travelling with fun in the bus. On reaching the dairy all the student were given hair cap and shoe covers so that we were safe and clean. In dairy we saw many species of cow and buffaloes. One of which was the species of cow Murrah. The manager of the dairy gave us room around of the whole place of Dairy. We saw an automatic milk extracting machine. The manager told us that he takes great care of all the cows or buffaloes he keeps, they serve their food and keep them clean. He told that when milk is to be extracted from the cow, the cow is first showered and then dried by a fan by which they are ready to give milk, then milk is taken out of them by machine. Milk is then tested and used to manufacture different products such as Paneer, sweets, curd and other. After roaming the dairy, we take picks and got out to come back. On the way, we had lunch from the Department and then returned to our college at 4 pm.

In this way, our study tour program was very enjoyable and no one has any problem with this tour.
