

## INDUSTRIAL VISIT

### INDUSTRIAL VISIT TO J.K.LAXMI CEMENT PLANT

Student of B.Sc. II Industrial chemistry visited J.K. Laxmi Cement plant, Ahiwara on 10 January 2020. The students were first briefed about the steps involved in the processing by slide presentation. They gained knowledge about the various processes involved in the manufacture of cement.

They also visited laboratories and got knowledge regarding the facilities available for analysis of cement and raw material like dolomite, silica, lime stone and haematite. They also witnessed the different stages of manufacturing and packaging of cement bags.

## INDUSTRIAL VISIT TO NANDINI LIME STONE MINES

As part of curriculum the undergraduate student of industrial chemistry visited Nandini Mines situated in Durg on 10 January 2020. Initially the students witnessed the extraction of limestone by blasting process. They also visited the limestone crushing plant. Students had a glance of several sophisticated instrument used for limestone and dolomite analysis.
