Government V.Y.T PG Autonomous College Durg (Chhattisgarh)

Career Counselling and Placement Cell

Placement Policy

The Training and Placement Cell, established in the year 2007 works with the objective of not only spreading awareness but also to motivate the students to focus on their future prospects with all seriousness and positivity. As the major populace of the college belongs to the rural areas, the students have little or no inkling of the multiple job prospects available. The Training and Placement Cell, which works under the supervision of educators appointed by the college administration, thus performs a very important function of bridging the gap between Industry and Academics.

The key aspects that are considered by the Institution and the Placement Cell are as follows:

- Guiding students at the time of admission into opting for programmes of their ability and desirability. Help Desk and various admission committees ensure that students opt for right disciplines .
- Facilitate an environment where the students get trained in Communication skills, Team building and Leadership development, Profile/Resume building, Group discussion. Interview skills and Soft skill development. The institute has been regularly organizing programmes on developing different aspects of job interviews. The departments at their level are actively engaged in organizing programmes that lead to the development of these skills. The department of English that runs the Language lab organises many programmes in the form of lectures and workshops for enhancement of English language competence and development of other soft skills required for successful job placement.
- Special guidance is given to final year undergraduate and postgraduate students in developing the skills necessary to get a good placement.
- As part of the institutional mechanism for placement of its students a number of Diploma, Certificate and Value Added courses have been introduced to give the students an extra edge .
- Placement Cell monitors activities related to job notification and opportunities, preparation for interview by organising mock interviews, development of entrepreneurial skills, organizing off- campus interviews as well as ensuring maximum participation in on-campus recruitments.
- Special guidance is given to the students to appear in the competitive exams organised by the state government. The consistent efforts of the Placement Cell has resulted in the selection of 76 students for the post of Assistant Profesor in Higher Education of Chhattisgarh government. Mock interview session was organised by the Placement Cell
- The Entrepreneur and Incubation Centre has also been established in the college in an effort to motivate the students to be job creators instead of job seekers. Subsequently it endeavours to create internship opportunities for the students so as to familiarize them with the tricks of the trade. Workshops are organised where students present their project receive first hand guidance from the experts of various industries.
