GENERAL INSTRUCTIONS FOR STUDENTS

- 1-The candidate has to obtain minimum 20% marks in each theory paper and internal assessment
- 2-The candidate has to secure minimum 36% marks as an aggregate in order to pass that semester
- 3-The internal assessment shall include class test, home assignment and seminar presentation.
- 4- a. In internal assessment the marks taken into consideration will be the average of two tests (i.e. the

West Brund Some

^{*}Field Work/Project work(If any in lieu of theory papers)-Rules regarding duration and time frame allotted to the students

^{*}Applicable for the concerned Semester

class test and the home assignment) for each paper and shall of 20 marks.

b. The seminar shall be in lieu of class test and home assignment combined and shall be of 20 marks

c. There shall be one seminar in each semester Paper-I (MANAGERIAL ECONOMICS) will be dedicated to seminar in First Semester, Similarly Paper (IV- Business Environment) to second semester, Paper IV- (MARKETING MANAGEMENT) to third semester and Paper V(RESEARCH METHODOLOGY) to fourth semester respectively for the purpose of Internal assessment.

5-The grading system shall be implemented from the session2015-2016 onwards for the students submitted in the first semester of all PG programmes.

DIRECTIVES FOR STUDENTS FACULTY AND EXAMINERS

- 1. There shall be three sections(Section A,B, AND C) IN EACH THEORY PAPER
- 2. Section A shall contain very short answer type questions(One or Two line answer or objective) type questions(fill in the blank) (not multiple choice question)
- 3. Section B shall contain short answer type questions with the limit of 250 words.
- 4. Section C shall contain long answer descriptive type questions. The students are required to answer precisely and the answer should not exceed the limit of 450 words)
- 5. The students are required to study the content mentioned in the curriculum exhaustively.

EVALUATION PATTERN

THEORY PAPER 80 MARKS=04 CREDITS

1-Very short answer type questions-Altogether 10 questions will be set from the entire syllabus, and shall be compulsory (02 x 10=20 Marks)

OR

Reference to context for literature students-Altogether 08 passages frp, the text prescribed for detailed study $(05 \times 04 = 20)$

2-Short answer type question-Altogether or questions to be set i.e. two from each unit with the internal choice. The candidates are required to solve one from each unit $(05 \times 04 = 20)$

3-Long answer type question-Altogether o8 questions to be set i.e. two from each unit with the internal choice. The candidate are required to solve one from each unit $(10 \times 04 = 40)$

INTERNAL ASSESSMENT 20 MARKS = 01 CREDIT

- Unit test- One class test in each theory paper comprising 20 marks (containing twp short answer type questions of 05 marks each and 05 objective type questions of 10 marks)
- Home assignments-Two long answer type questions from each theory paper containing 10 marks each/The answer should be prepared with the help of standard reference books.(The titles of those books, authors, year of publication and publishers details should be mentioned in an appropriate way, at the end of each assignment)
- Seminar presentation (Power Point)-Comprising 20 Marks)
- Paper-I (MANAGERIAL ECONOMICS) will be dedicated to seminar in First Semester, Similarly Paper (IV- Business Environment) to second semester, Paper IV- (MARKETING MANAGEMENT) to third semester and Paper V(RESEARCH METHODOLOGY) to fourth semester respectively for the purpose of Internal assessment. The marking of seminar shall be in terms of hard copy submission and CD (10 marks and presentation and open discussion 10 marks)
 - Practical/Field Survey of 100 marks = 04 credits)
 - ❖ Practical 200 marks =08 credits) Two practical's of 100 marks each
 - Field work /Project work (in lieu of theory papers)200 marks= 08 credits

CREDIT ALLOTMENTS

Odrat Brund Joseph

- Theory paper = 05 credits (04+01)
- ❖ Practical = 04/08 credits
- ❖ Field work/Project and viva(in lieu of two theory papers)= 08 credits

TOTAL CREDITS/SEMESTER

- Science Subjects with 04 theory papers (100 each and on two practical(100 marks)-20+08= 28 credits.
- Science subjects with 05 theory papers (no practical marks=25 credits.
- ❖ Arts Subjects with o4 theory paper = 25 credits.
- ❖ Commerce subject with 05 theory paper = 25 credits.

TOTAL CREDITS/PROGRAMME:

- 16 THEORY + 08 Practical+Project work= 80+32+08= 120 credits.
- 20 Theory- 100 credits (Maths)
- 20 Theory-100 credits (Arts and Commerce)
- 16 Theory-80 credits (Arts)

SYLLABUS FOR M.COM 2025-2026

M.Com First Semester

Managerial Economics Paper - I

M.M.-80 (Minimum Passing Marks- 16)

Course Objectives

- To help the students form a clear idea of Managerial Economics.
- To enable the students understand determination of price under different market forms.
- To enable the students understand the situation of consumer and producer equilibrium.
- To describe the concept of Inflation and its consequences in an economy.
- To illustrate the calculation of national income.

Course Outcomes

- Ability to forecast demand in light of changing circumstances and to formulate business plans.
- Understand how households (demand) and businesses (supply) interact in various market structures to determine price and quantity of a good produced.
- Analyze operations of markets under varying competitive conditions
- Understand the causes and consequences of Law of Production.

Managerial Economics: Meaning and definition of Managerial Economics, Nature and Scope of Managerial Economics, Relationship between Managerial Economics and other subjects, manning, characteristics, function and objective of a firm, theory of firm economic theory and managerial theory. Role and responsibilities of managerial economist's. Fundamental Principles of Managerial Economics-incremental, Opportunity cost, Discounting and Equi-marginal principles.

Unit 2

Demand Analysis: Meaning and definition of demand, individual and market demand function, Law of demand, Determination of demand, Types of demand, Factors effecting the demand, Elasticity of demand, its meaning and importance, factors influencing, elasticity of demand, Price elasticity, income elasticity and cross elasticity of demand. Uses of elasticity in managerial decisions.

Unit 3

Cost Theory & Theory of consumer Choice: Meaning and definition of cost, types of cost, short and long run cost function their nature, shape and interrelationship, Theory of consumer Choice: Cardinal utility analysis (approach), Indifference curve analysis (approach), Revealed preference and theory of consumer choice under risk, Demand estimation for major consumer durable and non durable products, Demand forecasting techniques.

Unit 4

Production Theory: Production function-production with one and two variable inputs, stages of production, Economics of scale, Estimation of production function, Law of returns to scale.Law of variable proportion-law of increasing return, law of constant returns, law of diminishing returns, Causes of operation of the law of diminishing returns, importance of law of diminishing returns.

SYLLABUS FOR M.COM. 2025-2026

M.Com First Semester

Statistical Analysis Paper – II

M.M.-80 (Minimum Passing Marks- 16)

Course Objectives

- To bring out clearly the importance of statistics in solving different research problems.
- To enable the students in-depth understanding of the concepts of probability, sampling, correlation and their applicability.
- To help the students gain a comprehensive view of the usage and importance of SPSS in solving different statistical problems

Course Outcomes

- Development of logical reasoning ability in students.
- Knowledge about the applicability of various parametric and non-parametric tests.
- Ability to use SPSS to solve statistical problems.
- Ability to make decisions under uncertain business situations.

Unit 1

Definition of statistics, characteristics of statistics. Distrust, user and importance of statistics. Types of data- primary data and secondary data, Direct Personal Investigation, Indirect Personal Investigation, Questionair & Schedule, Collection of Secondary data, Measurement of central tendency. Type of Mean- Arithmetic Mean, Mode, Median, Geometric Mean, Harmonic Mean, Quartiles, Deciles, Percentiles.

Unit 2

Measurement of dispersion-Range, Coefficient of Range, Quartile Deviation, Coefficient of quartile Deviation, mean Deviation and its coefficient, standard deviation, coefficient of variation, Karlpearson's coefficient of skewness, Bowlay's coefficient of skewness.

Unit 3

Probability Theory: Meaning of probability, Addition and Multiplication theorem of probability, probability model, Conditional probability, Bay's theorem, Mathematical Expectation, inverse probability, Bernoulli's theorem of probability. **Interpolation & extrapolation** — Bionomial, Newtons & Lagaranje's methods.

Unit 4

Probability Distributions: Binominal, Poisson's and normal distribution and its application. **Statistical decision theory**: Decision environment, expected profit under-certainty and assigning probabilities, Utility Theory.

M.Com Second Semester 2025-2026 TITLE OF THE PAPER

STATISTICAL ANALYSIS Paper – II

M.M.-80 (Minimum Passing Marks -16)

Course Objectives

- To bring out clearly the importance of statistics in solving different research problems.
- To enable the students in-depth understanding of the concepts of probability, sampling, correlation and their applicability.
- To help the students gain a comprehensive view of the usage and importance of SPSS in solving different statistical problems.

Course Outcomes

- Development of logical reasoning ability in students.
- Knowledge about the applicability of various parametric and non-parametric tests.
- Ability to use SPSS to solve statistical problems.
- Ability to make decisions under uncertain business situations.

Unit 1: Sampling and data collection: Sampling (Probability & non Probability) methods, Sampling and Non Sampling errors, Laws of large numbers and central limit. Theorem Sampling distribution and their characteristics.

Correlation :Karlpearsion's coefficients of correlation, probable errors, standard errors spearman's coefficient of correlation, concurrent deviation method of correlation, Calculation of correlation by least square method.

Unit 2: Statistical estimating and testing point of interval estimating of population mean and variance. Statistical testing hypothesis and errors, sample size, Large and Samll sample – T test, F test and Z test. Chi-square test, singe test, welcoxonsigne test, Rank test, Wald-Walfawing test, Kruslcal Walls test.

Unit 3: Regression analysis - Two valuable, regression, trend values. Index number -Meaning types, weighted aggregate Index, Fisher Ideal formula of index number, Time and factor reversal test special problem of shifting base, splicing overlapping index.

Unit 4: Statistical quality control: Causes of variation in quality characteristics, quality control charts-purpose and logic constructing control chart. Computing the control limits (X and R charts), Process under control and out of control. Association of attributes (Two attributes only)
