The place of women in our society is of great importance and plays a vital role in its construction and development. The most important task which our woman performs is of upbringing of our children. Children are the real wealth of nation on whose shoulders the future responsibility of guarding the interest of a nation lies. Unless mothers are truly well-educated, the upbringing of our children both male and female, must suffer in the most important early stages. This must be so whatever progress is to be made in the organization of our schools and colleges. This is enough to induce us to pay much greater and more scientific attention to the education of our girls than we are doing now.
