Sub: Virtual Public Interaction Program PIP on 26.05.2021 -reg.

Sir,

It's our immense pleasure to inform that a half day Public Interaction Program (PIP) is scheduled to be held virtual on **26.05.2021** (i.e Wednesday) from **2 to 6 PM**. The program will be conducted under the banner of **75 years of India's Independence**. The focus will be on the topics like achievements of CGWB, National Aquifer Mapping and Management Program, Ground Water Scenario in the Durg district.

In this context I invite you to kindly present one presentation on the relevant topics. I also request you to provide the participants for the Webinar on 26.05.2021 and the **Date and Time** of the meeting may kindly be intimated to participants so that the participants will be present in webinar. The link of the same will be sent shortly.

Thanking You

Yours faithfully

About the Webinar:-

Linear regression is perhaps one of the most well known understood algorithm in statistics and machine learning. In linear regression, how it works and how you can use it in on your machine learning projects. And you will learn the representation and learning algorithms used to create a linear regression model. In applied machine learning we will borrow, reuse and steal algorithms from many different fields, including statistics and use them towards these ends. Linear regression was developed in the field of statistics and is studied as a model for understanding the relationship between input and output numerical variables, but has been borrowed by machine learning.

Image processing is a way to convert images to a digital aspect and perform certain functions. It is one of the fastest growing technologies today with its use in various technologies today with use in various business sectors. Graphic design forms the core of the research space with in the engineering and computer science industry. It produces the final stage where the result can be changed to an image or report based on image analysis.

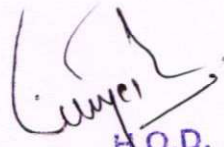

ANNs ability to take in a lot of inputs, process them to infer hidden as well as complex, non-linear relationships, ANNs are playing a big role in image and character recognition. Character recognition like handwriting has lot of applications in fraud detection (e.g. bank fraud) and even national security assessments. Image recognition is an ever-growing field with widespread applications from facial recognition in social media, cancer detection in medicine to satellite imagery processing for agricultural and defense usage. More research is going on in the field, for example — recent advances in the usage of LSTM and Recurrent Neural Networks for forecasting.

Objectives of the Webinar:

- Getting familiar with Linear regression and its methods;
- Innovation and design including design thinking.
- To expose students to current applications in the field of digital image processing.
- To study image processing operations.
- To understand image processing algorithms.

Day1 Proceeding: (26/05/2021)

The workshop was inaugurated By Speaker Dr. Mitul kumar ahirwal, Asst. Prof. Dept. of computer science and engineering MANIT BHOPHAL, along-with the Special Speaker of the function Dr. Amitesh jha , Asst. Prof . Dept of computer science & IT,GGU, Bilaspur. Other dignitaries present on the dais were Mr. Kartikey Pandey Asst. Prof. ACME Academy and Dr. R. N Singh, the Principal of Govt. V.Y.T. PG. Autonomous College, Durg.

Convener of the workshop Dr. Jagjeet kaur Saluja(IQAC Co- Ordinator) and Mr. Durgesh Kumar Kotangle, (Dept of Computer Science). Welcome speech & the objective of the Workshop.

Dr.Mitul Kumar Ahirwal, in his address, mentioned the Regression and artificial neural Network. He mentioned that Linear Regression and AAN predict an output variable as a function of the inputs. In this review, summarize the differences and similarities of these models from a technical point of view and compare them with other machine learning algorithms.

Day2 Proceeding: (27/05/2021)

The day2 (27/05/2021) session started with a discussion talk by Dr. Amitesh jha, He discussed the digital image processing. He showed various operations of image processing such as image enhancement. The idea behind enhancement techniques is to bring out detail that is obscured, or simply to highlight certain features of interest in an image, such as changing brightness & contrast.

The processing of images is faster and more cost effective. One needs less time for processing, as well as less film and other photographing equipment. It is more ecological to process images. No processing or fixing chemicals are needed to take and process digital images.

Dr.R.N Singh, Principal, Govt. V.Y.T. PG. Autonomous College, Durg, addressed the concluding session of the webinar. She showed her content mentioning the interest of the participants for the webinar as approximately 100 participants were benefited by this webinar who came from various places of Chhattisgarh. She appreciated the organizing team for conducting this type of webinar and expected such webinar in future also.

This was followed by a brief feedback session from the participants of the webinar. All participants expressed their satisfaction about the webinar and overall coordination of the faculties of the department as well as the whole program.

The webinar concluded with vote of thanks extended by Mrs. Latika Tamrakar. The webinar was ended with happy note from everyone.

VALUE ADDED COURSE SUMMARY REPORT :-

Instrument based survey training value Added Course was completed for 30 hours from 22.02.21 to 10.03. 21. Total of 31 students registered for the course. Certificate is given to all the students present.

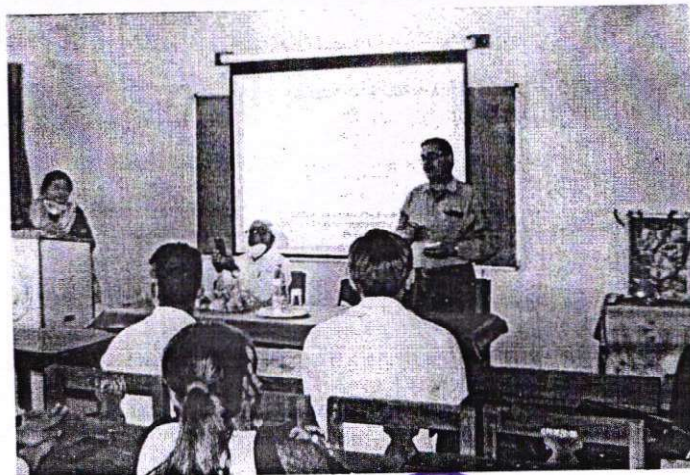

The objective of this course is to provide the students with information about tools of survey. So that survey work can be completed easily.

In plane table survey the errors made by the survey are known simultaneously by comparing the details to be marked in the map with the details of the area.

The main reason for leveling at the construction site in dumpy level survey is to level the field.

Theodolite is widely used in surveys to measure the verticality produced by other points at any point on the Earth surface. The survey itself begins with the horizontal and vertical reading. For which Theodolite is the most importance instrument.

The Prismatic compass has a prism which is used to capture observation more accurately. In chain and tap survey on the basis of linear measurements, a map and plan of a terrain is made in the field survey.

Collage Making Activity

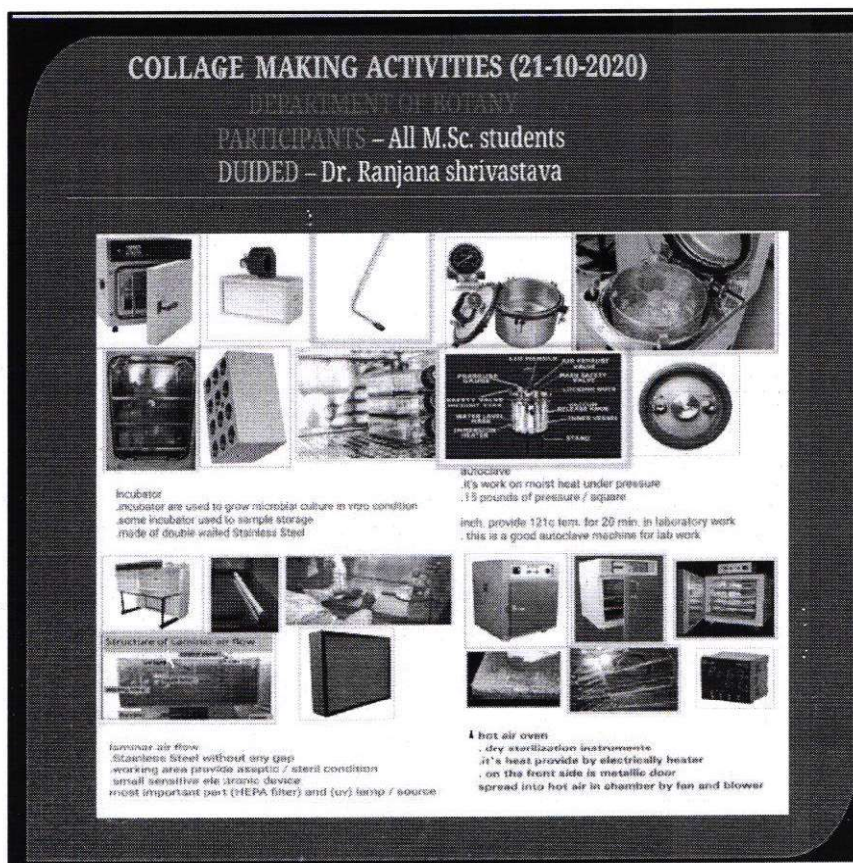

Date: - 21/10/2020

Aim: – To aware students about different instruments used in botany.

Objective: – Create awareness among the students and encourage them to aware others.

A poster making competition was organized by the department of botany, all students of M.Sc. has participated in the competition and made Collage posters on instruments. It was an effort to make students understand the importance and function of the instruments.

Outcome: – The students displayed their artistic skills through an array of collage posters on the given topic. The aim of this competition was not merely to see the creative aspect but also to trigger the thought process of the students for the function of instruments.

■ Webinar on Functional Nano Materials in Combating COVID-19 pandemic held

■ Staff Reporter
REUTERS, Oct 30

TWO-DAY international webinar on Functional Nano Material in Combating COVID-19 pandemic organised by Government VIT Post Graduate Autonomous College, Durg concluded on Friday. Several eminent speakers participated in the webinar and discussed about the Functional Nano Materials and its role in the combating the COVID-19 pandemic.

Papers from various researchers was also presented in the webinar with panel discussions on the research avenues and topics in the relevant field.

Director General of Chhattisgarh Council of Science and Technology Mudit Kumar Singh was the Chief guest at the valedictory function of the webinar.

In his concluding remarks after two days of deliberation and paper presentation on the functional nano material and its role on combating present COVID-

globally which is very apt in the present times. Mudrit Kurma Singh further explained the status of the pandemic in Chhattisgarh and deliberated that the State could contain the pandemic due to two major reasons one being the judicious social distancing and other being the cleanliness.

The Director General explained in details that the pandemic needs interventions from various domains of science from state of art PPE kit to respirators and also medicine and vaccine development. He also emphasised the role the CGOCT can play in supporting the research work and also welcomed the projects in the relevant domains as per the need of the State. Vice-Chancellor of Hemschand Yadav University, Dung Dr Aruna Palra was the Chief guest at the inaugural function.

Coronavirus guidance

Advice for people who think they may have coronavirus

- Step one**  Do not go to a GP surgery, pharmacy or hospital
- Step two**  Contact NHS 111
- Step three**  You may be asked to self-isolate
- Step four**  Your details may be passed to local health protection teams
- Step five**  You may then be tested for the virus
- Step six**  A doctor or nurse will give you advice on what to do next

Self-Isolation

- You must isolate yourself from others if you have COVID-19 symptoms or may have been exposed to COVID-19.
- If you start to feel worse, contact your health care provider or Central State Helpline number.

Self-isolation guide:

- Wash your hands frequently with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid sharing household items like dishes, drinking glasses, eating utensils.
- Clean and disinfect frequently touched objects and surfaces.
- Do not have visitors, and do not visit others. Avoid public places.

Strong Immune System is one way to avoid Corona

- No definite treatment and vaccine is recognize for the Covid-19.
- It is important to improve immunity to reduce the effects of any virus or bacteria.
- It may take a long time to develop a vaccine for the 'novel coronavirus'.
- It is not in our hands to stop the virus and its related diseases, but it is within in our hands to stand firmly against such diseases and strengthen ourselves.
- We will become stronger when our immune system will be strengthened. It is the protective shield of our body, which protects us from diseases.

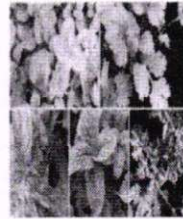

How to increase your immunity?

- To strengthen immunity, the role of diet becomes important in lifestyle. All minerals and vitamins except vitamin B-12 can be obtained from vegetarian food.
- Supplements can be taken for vitamin B-12 only on the advice of a doctor.
- Routine food should be full of nutrition and diversified.
- For dry cough, steam it once a day with fresh mint leaves or celery.
- If you have cough or sore throat, take dose powder with natural sugar or honey 2-3 times a day.

CORONAVIRUS OUTBREAK MYTH VS FACT

MYTH
 Vitamin C supplements will stop you from catching COVID-19

FACT
 Researchers have yet to find any evidence that vitamin C supplements can render people immune to COVID-19 infection.

FACT:
 Adding pepper to your soup or other meals DOES NOT prevent or cure COVID-19.

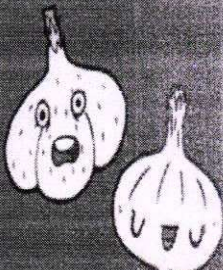

For peppers in your food, though very spicy, cannot prevent or cure COVID-19. The best way to protect yourself against the new coronavirus is to keep at least 1 metre away from others and to wash your hands frequently and thoroughly. It is also beneficial for your general health to maintain a balanced diet, stay well hydrated, exercise regularly and sleep well.

World Health Organization #Coronavirus #COVID19 27 April 2020

Can eating garlic help prevent infection with the new coronavirus?

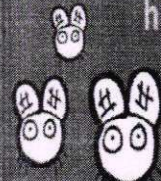

Garlic is a healthy food that may have some antimicrobial properties. However, there is no evidence from the current outbreak that eating garlic has protected people from the new coronavirus (2019-nCoV).

World Health Organization #2019nCoV

FACT:
 COVID-19 IS NOT transmitted through houseflies

At this time, there is no evidence or information to suggest that the COVID-19 virus is transmitted through houseflies. The virus that causes COVID-19 spreads primarily through droplets generated when an infected person coughs, sneezes or speaks. You can also become infected by touching a contaminated surface and then touching your eyes, nose or mouth before washing your hands. To protect yourself, keep at least 1-metre distance from others and disinfect frequently touched surfaces. Clean your hands thoroughly and often and avoid touching your eyes, mouth and nose.

About the Webinar:-

Web design refers to the design of websites that are displayed on the internet. It usually refers to the user experience aspects of website development rather than software development. Web design used to be focused on designing websites for desktop browsers; however, since the mid-2010s, design for mobile and tablet browsers has become ever-increasingly important.

Millions of people around the world have access to internet and any business can benefit greatly by having a well designed, professional looking website because website speaks a lot about your business and represent the image of your company.

The most important reason for having a website or importance of a website is to be found by your potential clients, as they are likely to find you on the web and get access to your contact details, business hours, details about your product and services, in fact your website is working for you 24/7 even when your office is closed. Your website can be as important as your telephone connection. The simple point of having a website for your business is, increasingly numbers of people are turning to the internet to find out information about product and services and your presence on the internet makes it easy for your prospective clients to find you easily.

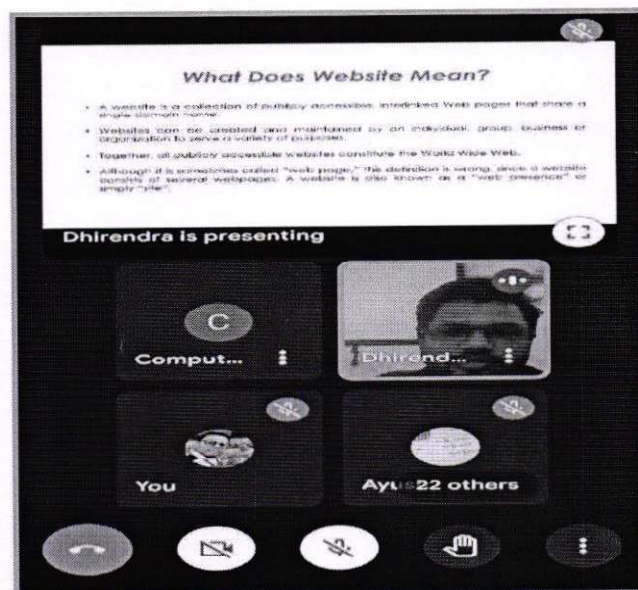

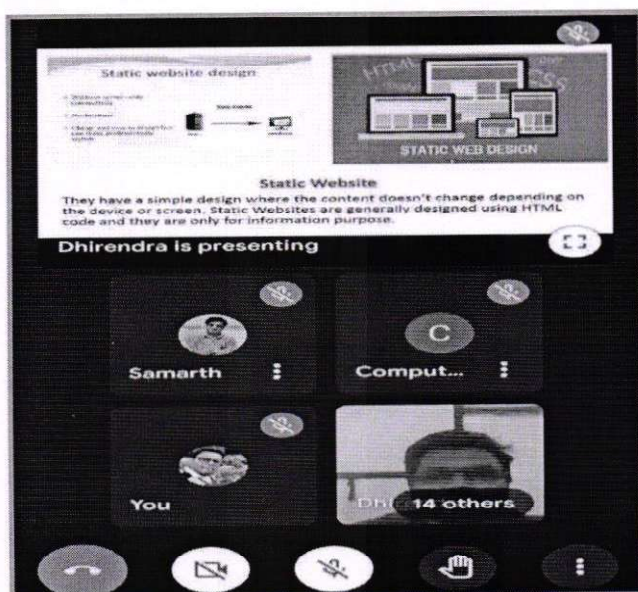

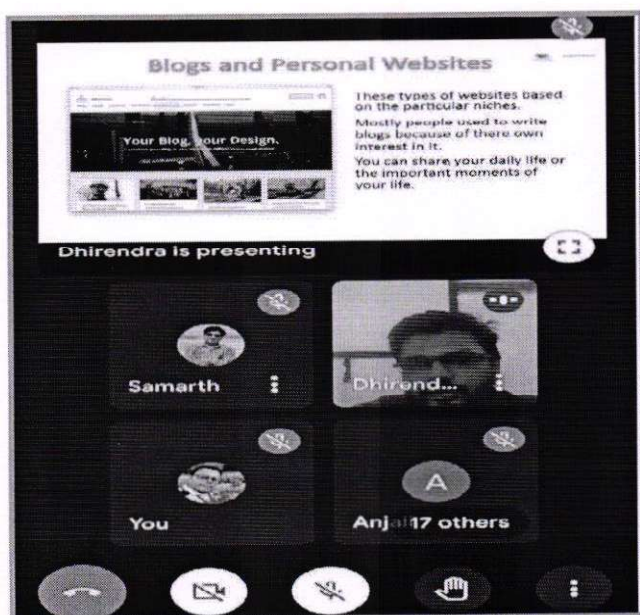

Objectives of the Webinar:

- An e-commerce website, even small businesses can advertise their products massively on the platforms like Google & Facebook.
- Some businesses need a website to create awareness about their services or products.
- Providing quality content on your website, regularly adding new information establishing trust, marketing your website on other websites and social media.
- E-mail marketing lists, online support (live chat), webinars, and content designed to give your visitor a reason to come back.

INDUSTRIAL VISIT TO KAMAL SOLVENT EXTRACTION PLANT

Undergraduate student of Biochemistry and Industrial chemistry witnessed the operation of manufacture of rice Braun oil in KAMAL SOLVENT on 20 January 2020. Here they saw the solvent extraction process. They also got insight into various activities like centrifugation drying and dehydration. They also got knowledge about the analysis of oil. They also witnessed the deionisation and recycling process of water.

THE students were interested to know about the year of establishment of the plant, project cost production and availability of raw material and marketing of the product.
