About Biodiversity Park

The Biodiversity Park at Talpuri will have the beauties of nature along with Open Theater, Lotus Pond and Boating facilities in the coming time. This biodiversity park spread over 250 acres will also house many migratory birds due to wetland. Walking in the path amidst the shade of thousands of trees, people will find themselves completely close to nature.

This initiative to connect people with nature emotionally in this way is highly appreciated. The Memorial Corner states that by protecting nature, we can

also protect our existence. It is worth mentioning that Biodiversity Park has already been a very rich area for diverse species of trees. Recently, intensive planting was also done here. This plantation will further enrich the biodiversity here. According to the way the wetland is being developed here, by planting saplings, this area will be better developed as a home for the birds.
