Interdisciplinary Research Activities

We have a good ecosystem for Research activities among various research-oriented departments. There is good coordination among Physics, Chemistry, Botany, Zoology, Microbiology, Biotechnology and Sociology for research activities. The laboratories and research facilities of various departments are accessible for all researchers irrespective of the departmental disciplines, besides, we have one central instrumentation laboratory, which is open not only for members of our college but is open for outsiders also.

Some major interdisciplinary research works which have been successfully implemented, are hereby summarized below –

1. Between Department of Physics and Chemistry

- a. Under interdisciplinary programme, the Department of Chemistry and Physics are working together under DST sponsored research project between India and Bulgaria on topic – Ultrahigh – Efficiency lead free Perovskite Solar Cell. This project has been implemented under India-Bulgaria Intergovernmental Programme. Dr. A.K. Singh from Chemistry and Dr. R.S. Singh of Department of Physics are collaborator for this research work.
- b. A combined research paper of Prof. A.K. Singh and Prof. R.S. Singh has been published and has been awarded as United Group Paper Award from Bangladesh.

2. Between Department of Physics and Microbiology

Prof. Anjali Awadhia of Department of Physics and Dr. Pragya Kulkarni of Department of Microbiology have jointly conducted research study on – “Effect of Cross-Linking on the Toxicity of CdTeQDs in Solid/Liquid Medium, and have produced publication.

3. Between Department of Physics and Mathematics

The department of Physics is cooperating in teaching process of Department of Mathematics. The faculty of Department of Physics are teaching mechanics to M.Sc. IVth Semester Maths. students.

4. Between Physics and Geology

The Department of Physics is characterizing geological samples provided by the geology department. Under this collaboration they have produced one research paper entitled – “Thermo luminescence studies of Band Y-Irradiated Geological

materials for Environment Monitoring.” They have also produced on book for their combined work.

5. Between Chemistry & Microbiology

The Chemistry Department and Microbiology Departments have performed collaborative study for evaluation of antibacterial and antifungal effect of synthesized complexes. The Chemistry Department is synthesizing complex compounds and its antibacterial & antifungal features has been examined by the Department of Microbiology.

6. Between Chemistry and Biotechnology

Both Department are performing antimicrobial effect of various nanoparticles. The Nanoparticles synthesized by the Department of Chemistry are being tested for their antimicrobial features in the Department of Biotechnology and the green nanoparticles synthesized in the Department of Biotechnology are being characterized through FTIR by the Department of Chemistry. Besides, some heavy metals from the sample of Urine & Blood of Renal Dysfunction patients, studied by the Department of Biotechnology are being detected by the department of Chemistry through Atomic Absorption Spectrophotometry.
